

The statistics page has been provided for the user to understand their selection from history based on a few parameters.

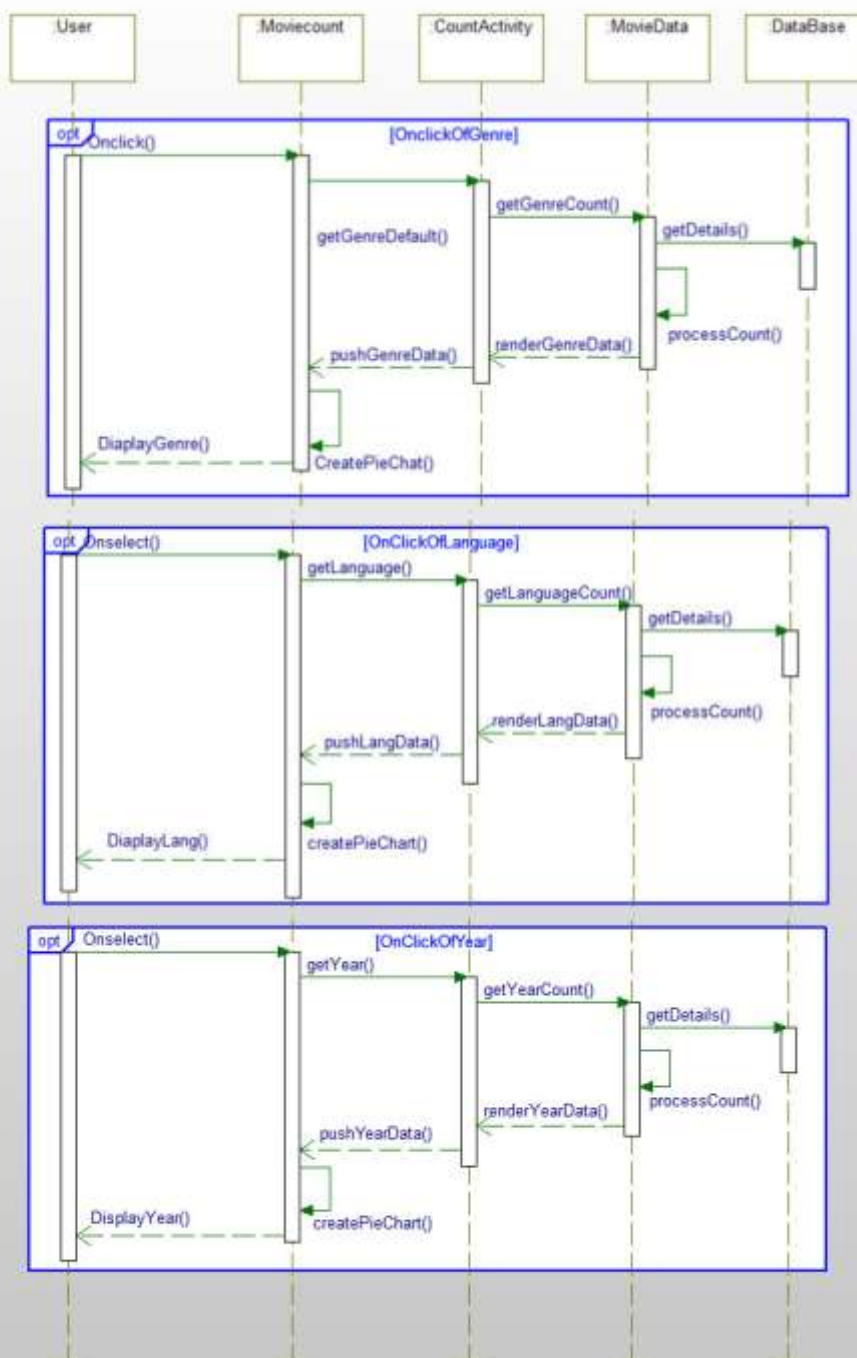

- The statistics page displays the pie chart, drop down box, share option.
- The drop down options are Genre, Language, Year.
- Genre will have sub divisions such as action, comedy, horror etc.
- Language will have sub divisions such as English, Chinese, Hindi etc.
- Year will sorted through 2015-2016, 2016-2017 etc.

For this operation, the user should be able to fetch information according to the selection of the user from the MongoDB. The calculations have to be made and by choosing the colours (or any other parameter ) to differentiate with one chosen option to display on the piechart.

Below is the screenshot of the wireframe of the statistics page.
